Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 1-3

because:

☒ the said international application, or the said claims Nos. 1-3

relate to the following subject matter which does not require an international preliminary examination (*specify*):

Claims 1-3 are merely a disclosure of information, which is related to a scope that does not require International Primary Search.

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. _____ are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. _____ are so inadequately supported by the description that no meaningful opinion could be formed.

☐ no international search report has been established for said claims Nos. _____

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.

☐ See Supplemental Box for further details.

Box No. VIII **Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Because the disclosure provided within the meaning of PCT Article 5 with regard to the technical feature described by the language “specific information used for making an assessment as to whether or not to create image data management folders with names in accordance with a predetermined rule” in claims 1 and 7 consists only in a technology for making a determination as to whether or not an information recording medium is permitted for writing image data (specification, page 11, line 21 to next page, line 2, page 17, lines 15 to 19) with the help of “information used for making an assessment as to whether or not a recording medium is authorized for writing image data” (specification, page 8, line 11 to line 20), claims 1 and 7 lack support within the meaning of PCT Article 6.
